Meet Wale: The Vision Behind HEW Projects

As a registered building designer and builder my journey into the building industry began early in the High school when I discovered my passion for forms in space and a taste for the function of space. I soon find myself drawing shapes on paper and creating miniature houses with cardboards. This spark ignited a lifelong commitment to creating beautiful spaces and functional homes for my clients for which I pursued a Bachelor's and , A Master's degree in Architecture, and then widened my scope with a diploma in building construction, and a certificate in carpentry by apprenticeship with a licensed carpenter. HEW PROJECTS was birthed with a vision to work and walk alongside prospective and existing homeowner, ensuring their dreams of a beautiful home and space become a reality. I've learnt that every client

deserves a stress-free design and construction process, and I therefore strive to deliver that through clear communication consultation and commitment to quality.

Over the past eight years, I've built and sustained this business with a dedicated team of five, qualified staff and still growing; completing over 90 projects whilst aiming towards 100% client-satisfaction. I am endeared to timely project handovers because of the beautiful smiles I see on customer's faces.

At leisure, with my family, church activities, local soccer club and travels, all of which I love, I still remain committed to my mission; building dreams and delivering excellence in Brisbane, Gold Coast and it's environs. With me, your journey to a dream home remains a enjoyable and rewarding a a final result.
